Operations Sheet
GlidePack MultiTrack 13

The Camfil GlidePack MultiTrack 13 is a multi-stage air filter housing with adaptable tracks to apply a variety of prefiltration and secondary filtration.

Filter Combinations

Multiple filter combinations can be included inside the housing. Only use 1" nominal headered filters in last section of extrusion track.
Warning: Do not operate without the proper filters installed, header track is not designed for 1" filters.

			
Option A: Up to (3) 2" filters	***Option B:*** (1) 2" filter (1) 4" filter	***Option C:*** (1) 6" filter	***Option D:*** (1) 6" Header filter

Filter Installation and Removal

To install filters: Open access door, push filter to slide inside extrusion track. The GP MT13 housing can accommodate 2", 4", 6" filters and 1" nominal header 6" deep filters. Please see information above for filter combinations. To install 4" or 6" filters, remove the track dividers from the extrusion track. Close access door and secure with latches.

To remove filters: Open access door, pull filter to slide out of extrusion track. Close access door and secure with latches. There are no general rules for recycling/disposal of used filters. Different rules for disposal exist on local level in all countries. Please contact the recycling company in your district and ask how to handle used filters.
